Model Number

Serial Number

Most Braden winches have a raised pad on the housing which is embossed with the model and serial numbers of the winch. Since both of these numbers are extremely important in the shipment of the proper replacement parts, your order should always reference these numbers.

FOR BEST RESULTS, ALWAYS USE GENUINE BRADEN REPLACEMENT PARTS

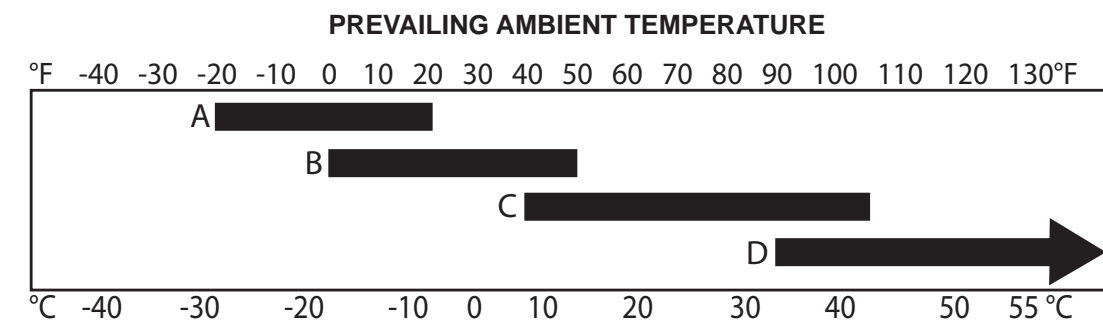

TO ORDER PARTS:

1. List model and serial numbers of the winch.
2. Refer to exploded view and select the component(s) needed and list the item number(s).
3. Find item number(s) on material list, show part number, description and quantity required on your order.

RECOMMENDED WORM GEAR OIL

We have published the following specifications to help you determine which lubricant is best suited for your application. For simplicity, Braden has listed one readily available product in each temperature range which has been tested and found to meet our specifications. This is not to say that other lubricant brands would not perform equally as well.

If the following lubricant brands are not available in your area, make certain your lubricant vendor supplies you with oil that is equivalent to those products listed below.

- A. AGMA Grade 3 EP; Mobilgear 600xp 100 or equivalent
- B. AGMA Grade 5 EP; Mobilgear 600xp 220 or equivalent
- C. AGMA Grade 7 EP; Mobilgear 600xp 460 or equivalent
- D. AGMA Grade 8 EP; Mobilgear 600xp 680 or equivalent

Brand recommendations in tier C climate range:

- MOBIL Mobilgear 600xp 460
- SHELL Omala 460
- CHEVRON Gear Compounds EP460
- TEXACO Meropa 460

⚠ WARNING ⚠

Do not use aftermarket additives in worm gear oil. Some additives may contain substances which could cause glazing of brake discs or impede the firm locking action in the brake rotor assembly. Both symptoms could reduce load control which may result in property damage, personal injury or death.
